Election/Restrictions

This application contains claim 3 drawn to an invention nonelected without traverse in the reply filed on May 2, 2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Uchimaru et al., JP 2002-155143.

In the Examiner's estimation, there have been no substantive changes made to claim 1 that would merit the withdrawal of this rejection. Whether Applicant employs the connecting phrase "used in" or the word "for", the subject matter that follows in the remainder of the preamble is still nothing more than a recitation of intended use and, thus, is not assessed patentable weight.

Concerning claim 2, the disclosure, again, contemplates mixtures of these compounds at paragraph 32. Further, the advocated ratio is at least anticipated at 0:100 insofar as the reference clearly contemplates both types of compound in an isolated form. The remainder of the claimed ratio would be rendered obvious by virtue of the fact that it is claimed sufficiently broadly so as to embrace every mixture except

those wherein the borazine featuring internal alkyne substituents is made available as less than 10 weight parts per 100.

The Examiner has withdrawn the remaining prior art rejections in view of Applicant's remarks. As for the double patenting rejection, the Examiner has decided upon reconsideration that it should not have been made. In essence, the Examiner's rejection was predicated on the notion that, had the co-pending method and instantly claimed material been claimed in the same application, they would not have been candidates for restriction and, therefore, are patentably indistinct. However, this rationale is not valid because, in fact, there are many conceivable patentably distinct processes that could have been exploited to make the same product, e.g. by using a homogeneous catalyst instead of a heterogeneous catalyst.

Allowable Subject Matter

Claims 4-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
